

Zhejiang LICHENG Printing&Dyeing Machinery Technology Co.,Ltd

Zhejiang Licheng Group is located in No.1, Jintong Industrial Zone, Jintong Town, Shengzhou City, Zhejiang Province, China. It occupies 17.5 acres with constructed building size over 55,000 square meters. This group consists of four subsidiaries: Zhejiang Licheng Printing & Dyeing Machinery Technology Co., Ltd., Zhejiang Lihong Printing & Dyeing Machinery Technology Co., Ltd., Zhejiang Lirun Printing & Dyeing Machinery Technology Co., Ltd., and Zhejiang Richeng Printing & Dyeing Machinery Technology Co., Ltd. Its main industry is design, R&D and manufacturing a series of printing and dyeing machineries, such as hot air stenter, [Flat Screen Printing Machine](#), and rotary screen printing machine.

Among these four subsidiaries, Zhejiang Licheng Printing & Dyeing Machinery Technology Co., Ltd. is the predecessor of the group, who founded in July, 2007 and now it becomes a most competitive manufacturer of hot air stenter in China. For the better development of the company, and providing our honorable customers better service, Licheng invited two companies with decades machine manufacturing and sales experience and becoming the Licheng group. And change their names to Lihong the rotary screen printing machine manufacturer, and Richeng, the flat screen printing machine manufacturer. Rirun is the company we plan for digital printing machine manufacturing.

Commitment of Hotairstenter.com

We are real manufacturer of a series printing & dyeing machines.

Our goal is to provide high-quality products to customers and market.

Although the markets, applications, and customers are different, Licheng has a unique idea to guide customers to success.

For any consultation and feedback, we will reply patiently and carefully.

For any inquiry, we will give reasonable quotation as soon as possible.

For any new product, we will communicate with customers and take their ideas into consideration to make the best product.

For any order, we will finish the production on time.

We'll take time to deal with each issue, no matter how mundane it may appear to you. We'll always accommodate you. And you'll find that we speak your language and understand your technical problem. That's why we can cooperate successfully with our clients from nearly 30 countries in so many years.

Our company continuously introduced professional and technical personnel and advanced processing equipment and tools so that the quality of products have been a strong quality assurance. We successfully developed energy-efficient and most cost-effective [Flat Screen Printer](#) machine. We have a complete sales network, the products was sailed into Guangdong, Fujian, Jiangsu, Zhejiang, northeast and overseas regions. Good quality achieved praise from the majority of customers.

Seven Advantages Of Licheng of Flat Screen Printing Machine

Customization:

We have a strong R&D team, and we can develop and produce products according to the drawings or samples the customers offered.

Cost:

Companies uphold management purposes of quality and service, dedicating to provide new and old customers with quality products and services and meet customers needs in maximum extent possible. Customer service, customer success, "pioneering and innovative, pursuit of excellence" is the constant pursuit of Zhejiang Licheng legislation, and sincerely look forward to working with new and old customers and creating a better future!

Quality:

We have complete set of machining equipment which can ensure the accuracy of parts and the quality of stereotypes. We only use premium electrical systems of the industry's leading brands to ensure that the sizing machines are adapted to a variety of complex operating environments.

Diversity:

We can provide a variety of stenter configurations, suitable for all kinds of fabric production. With more than 800 sets stenter sales experience, we know better about diverse market requests, which also guaranteed us to help our customers with the best stenter type and configurations.

Production Capacity:

Our annual production capacity is over 200 sets of printing & dyeing machines. We can meet the needs of different customers with different purchase quantity.

Services:

We provide strong sales and technical services through our extensive distribution network in many areas. Our experienced and professional engineer teams provide prompt and reliable service to customers starting from stenter delivery.

Shipping:

We are only 135 kilometers away from Beilun port, the exit is very convenient.

FAQ of Hotairstenter.com

1. How long can I receive your reply after I send my inquiry?

We will reply you within 12 hours on workday.

2. Are you a manufacturer or a trade company?

We have our own foreign trade department, we market our own products.

3. What products can you provide?

We mainly produce series of printing equipment, such as hot air stenter, flat screen printing machine, rotary screen printing machine.

4. What are the application fields of your products?

Our products almost cover the entire printing and dyeing machinery manufacturing and machinery manufacturing and processing industry can be applied.

5. Can you provide custom products?

Yes, custom products are our main products. We can develop and manufacture products according to customer's drawing or sample.

6. How's your production capacity?

Annual production is more than 20,000 tons.

7. How many employees do you have?

We have over 230 employees, including 50 technicians and 10 engineers.

8. How can you ensure your product quality?

We conduct inspections in every production procedure, and for finished products, we will take 100% inspection depend on international standards according to customer's requirements.

9. Payment?

We will confirm the payment with you when quoting, like FOB, CIF, CNF or others. In batch production, we accept 30% deposit, balance

against the copy of B/L. T/T is the main payment, and L/C is acceptable as well.

10. What's your delivery method?

We commonly use sea transportation, because we are only 135km to Ningbo port, the sea transportation is convenient.

Flat Screen Printer

Flat Screen Printing Machine Features:

Easy and convenient for operation, high printing precision and production speed, low malfunction rate and maintenance cost, applicable to a wide range of fabrics printing process.

Technical parameters

Information of Flat Screen Printer:

Model: F1

Printing width: 1900mm-3200mm

Printing repeat range: 400-3200mm

Printing color quantities: 8-16

Features of the F1 Flat Screen Printer: Its appearance is stylish and beautiful, adopted soft platen with customizable length and quantity of colors.

◆All electric components are from Mitsubishi, Omron, Yaskawa, Schneider, etc.

◆All pneumatic components are from the Japanese brand of SMC

◆Reinforced printing blanket is from the German brand of Siegling

◆Main drive reducer of blanket is from the German brand of SEW

◆Lifting driving screw is from the Japanese brand of THK

Hot Air Stenter

Application: This stenter suits for weight arrange 50-700g/m² cotton, wool, linen filament, silk etc. knitted or woven fabrics auxiliaries padding, stentering, drying and heat-setting.

Technical parameters

The main technical parameters

1. car type: right-handed or left-hand drive vehicles
2. Nominal width (W) : 1800-3600mm
3. Nominal speed: 10-110m/min
4. Amplitude range : 700- (W-200)
5. Motor drag way: AC frequency conversion
7. Heat source: hot oil, gas (city gas, natural gas, water gas, liquefied petroleum gas), steam, electricity
6. Holding methods: needle plate or cloth iron
8. Falling cloth: mercy, package (diameter ≤ Φ1500m) dual-use
9. Rail Type: Oil-free steel rail or cast rail
10. Oven section number: 5-12 section
11. 250° Oven temperature: up to 250 °
12. Installed capacity: about 15n + 55KW (excluding electric heating capacity)
13. Overfeed rate range: -20% + 80%
